

Workspaces from a template.

Three minutes. No IT ticket. No detour. Project leads launch their own space.

Self-service, IT-compliant.

Every workspace is built from a preconfigured template. Permissions, metadata structure, document templates – all built in.

Configured once. Consistent always.

Integration

MetaShare & FlexxStore Platform.

FlexxStore delivers the metadata mapping from Dynamics 365 per document type. What is defined in the ERP is automatically applied to every new workspace.

IT gains time. Business gains speed.

Both gain consistency.
