

Compliance as a byproduct.

GDPR, ISO, QHSE. Not another tool. Just part of how you file.

Rules that follow along.

GDPR classification, access controls, audit trails. MetaShare sets these policies centrally – and applies them automatically to every workspace.

Configured once. Effective everywhere.

Integration

MetaShare & FlexxStore Platform.

FlexxStore brings the security privileges from Dynamics 365. Rights management runs per document type – what is regulated in Dynamics 365 also applies in MetaShare.

Requirements, built in.

Audit readiness becomes habit. Not exercise.
