

One search, all sources.

Teams, OneDrive, SharePoint and MetaShare. One search bar. Every result lands directly.

Search that understands.

Modern teams work across four tools at once. MetaShare unifies the results while respecting permissions and security configurations.

One click. One result.

Integration

MetaShare & FlexxStore Platform.

FlexxStore extends the search with the archived document inventory from Dynamics 365. Full-text search covers invoices, contracts, delivery papers – with business context as filter.

Find, don't gather.

Everything in one place. Without changing places.
